## **TTerm Setup for iPad**

- 1. Access AppStore App on your iPad
- 2. Type in *tterm pro* in the **SEARCH** field

### 3. Select the one that says TTERM PRO

#### 4. It should be \$49.95

5. Enter your iTunes Account Password

### 6. Click on the **TTERM PRO** App

7. Once your App is open, you will see Create a New Connection . Select it

8. You will see the settings for your new connection. It should look like the picture below

	13.00		\$ 75
TTerm Pro	Cancel	Edit Connection Help	
Connections	General Settings		
🔆 Settings	Connection Name	New Connection 1	1
User Guide	Display Name	New Connection 1 DEC VT 420 via Telnet	>
<ol> <li>About TTerm Pro</li> </ol>	Connectivity Settings

	Remote Host	Remote hostname or IP address	5
	Advanced Settings		
	Display		>
	Hotspots		>
	Color Scheme	Default (Blacks)	>
	Keyboard		>

# 9. Now click where it says *New Connection 1* and change it to what you want to name it In this example, we called it **CSLINUX**

10. After you're done editing CONNECTION NAME, click on DISPLAY NAME

11. In the **DISPLAY NAME** windows, make sure it only says [connection name] 12. Click on **EDIT CONNECTIONS** to go back
